

User API

SBMLNetwork Python Package (High-level Abstraction)

Reaction Center

```
c = r.get_center()
c.switch_to_shapes()
c.set_fill_color()
```

Curve

```
c = r.get_curve()
c.set_color()
c.set_thickness()
c.set_points()
```

Reaction

```
r = net.get_reaction()
r.set_position()
r.set_colors()
r.set_thicknesses()
```

Network

```
import sbmlnetwork

net = sbmlnetwork.load()
net.draw()
net.save()
```

Species

```
s = net.get_species()
s.set_position()
s.set_size()
s.set_shape()
s.set_fill_color()
s.set_border_color()
```

Shape

```
sh = s.get_shape()
sh.set_relative_position()
sh.set_corner_radius()
```

Label

```
lb = s.get_label()
lb.set_text()
lb.set_font()
lb.set_relative_position()
```

Shape

```
sh = c.get_shape()
sh.set_relative_position()
sh.set_corner_radius()
```

Compartment

```
c = net.get_compartment()
c.set_position()
c.set_size()
c.set_shape()
c.set_fill_color()
c.set_border_color()
```

Label

```
lb = c.get_label()
lb.set_text()
lb.set_font()
lb.set_relative_position()
```

Language Bindings

libSBMLNetwork Python Module
(Python C Integration via ctypes)

SBMLNetworkWeb JavaScript Module
(C to WASM Compilation via Emscripten)

libSBMLNetwork C API

Core Implementation

libSBMLNetwork C++ Library and API (Core Algorithms and Functionality Implementation)

Standards I/O

libSBML Layout and Render C++ API

Standards Specifications

SBML Layout and Render Packages
